

Assessing your Church's Hybrid Capacity

10

5

1

Resources & Technology

Ample technology hardware to provide solutions for most church events including liturgy, governance & education for formation. Software investment is adequately able to engage participants & provide a high level of experience quality .
A sustainable & well-trained team of volunteers is in place.
A budgeted replacement & maintenance plan for long-term sustainability of hardware is in consideration.

Liturgy, governance & education for formation consistently are considered, enabled by technology, where appropriate.
Online provision of content regularly provides opportunity for feedback.
Where appropriate, online participants may engage in ways that fit the event or service.
Regular metrics of engagement & participation are collected & reviewed by church leadership.

Online Engagement & Connection

10

Instructions: Review the descriptors. Determine an overall score (1 where your church is beginning, to 10 where all is fully realized). Place a single X on this X-Y scale, where the X-axis represents resource & technology, ability & investment, & the Y-axis represents the status of your church's online engagement & connection. After completing this assessment, please see the other side of this card.

Understanding your Church's Hybrid Presence & Forward Planning – A Self Evaluation Tool

After locating your parish on the X-Y graph (page 1), transfer your result here. Then consider, does this represent your church's current context? What are your next steps?
