

Online Mission & Ministry Working Group

We serve the Church's participation in the mission of God, meeting people where they are and calling them into life-giving community. This group supports worship, pastoral care and parish gatherings in a digital-connected world. We use approaches that reflect the reality of how people live and form community today – fully online and in hybrid that bring together those in physical and online spaces.

Online and hybrid mission and ministry are an expression of an incarnational faith – rooted in presence, relationship and hospitality – opening pathways to new places of ministry.

Sharing learning from across our Diocese, we offer parishes ideas that encourage experimenting with confidence, deeper connections, and the nurturing of discipleship. As parishes bear witness to Christ, and extend that witness beyond church walls, our Diocese will adapt and flourish with God's love in our technology-shaped world.

Our purpose

We support parishes in reimagining ministry by offering practical ideas and ways to share Christ's love through online and hybrid engagement, including:

- pastoral and missional opportunities of digital ministry, and
- optional approaches and tools to strengthen collaboration and foster innovative forms of ministry across our Diocese.
